📄 Available for Immediate Interview | Open to Onsite (KSA)

Professional Summary

Senior Software Engineer with 5+ years of experience in building enterprise-scale web applications using **Angular, React, and Next.js**. Strong background in state management, performance optimization, and scalable frontend architectures. Experienced in delivering secure, user-centric solutions for **fintech, telecom, SaaS, and enterprise platforms across MENA and global markets**. Comfortable working in cross-functional teams, mentoring juniors, and contributing to CI/CD and cloud-ready environments.

Skills

Frontend
Angular (v8–20), React.js, Next.js, TypeScript, JavaScript (ES6+), RxJS, NgRx, Signals, SCSS, Tailwind CSS, Bootstrap, PrimeNG

Tools
Git, Jira, Postman, Docker (CI/CD support), AWS (basic), Agile/Scrum, MS Word, MS Excel

Backend
REST API Integration, Node.js, MySQL

UI & Data Visualization
Chart.js, ApexCharts, Responsive Design, Design Systems, Accessibility (WCAG basics)

Architecture & DevOps
SPA & SSR Applications (Angular + Next.js), State Management (NgRx, React State Patterns), Code Splitting, Lazy Loading, SEO Optimization (Next.js), Enterprise UI Architecture, Performance Optimization

Additional Skills
Cross-team Collaboration, Mentoring Junior Developers, UAT Support & Bug Tracking, Documentation & Technical Reporting (Excel, Word)

Experience

Senior Software Engineer, *Funavry Technologies* — 03/2024 – 01/2026
- Led development of **Angular and Next.js** applications for large-scale enterprise and MENA digital platforms, focusing on scalability, SSR performance, and maintainable frontendarchitecture.
- Implemented NgRx-based state management, React States, integrated REST APIs, and optimized frontend performance.
- Mentored junior developers and facilitated cross-functional collaboration.
- Managed Docker pipelines for efficient CI/CD workflows.
- Prepared **Excel reports for UAT evaluations**, tracking bugs, test coverage, and release status in coordination with QA and product teams.

Software Engineer, *Funavry Technologies* — 08/2023 – 03/2024
- Delivered enterprise modules with high performance and clean architecture.
- Collaborated with UI/UX teams to integrate designs via Figma.

Junior Software Engineer (Angular), — 03/2021 – 08/2023
AXA Business Technologies (via AKSA SDS), Islamabad, Pakistan
- Built Angular libraries and custom architectures for enterprise clients.
- Developed Angular-based frontend applications for SaaS and FinTech platforms.
- Integrated OCR solutions using Flask and EasyOCR with React frontend.

Intern → Junior Full Stack Developer, *CompileSol* — 09/2020 – 03/2021
- Built ERP modules using Angular and Laravel with API integration.
- Delivered responsive UI from PSD designs and managed API services.

Projects

Del Monte – QFS, *Funavry Technologies Project*
- Managed implementation of secure, performant modules for MENA, NA, TM projects.
- Focused on scalability, modular code, Optimized application performance by 30%, implemented offline support and chatbot integration.
- Contributed to digital process optimization and smart enterprise workflows, aligning with regional digital transformation objectives.

Teamerage (Phase - 1), *Funavry Technologies Project*
- Built the Angular 17 application from scratch using hybrid (standalone + modular) architecture.
- Developed scoring modules and handled client UAT and demos.

Wallet Finder – Blockchain Explorer, *Funavry Technologies Project*
- Managed development for dynamic wallet views, UI releases, PR reviews, and frontend code quality
- Implemented dynamic routing, SSR/CSR optimization, and reusable React components for large-scale, dataheavy views.

Rummy, *Funavry Projects*
- Fixed and optimized **React-based web views** for Unity WebGL game rendering in browsers.
- Improved loading flow from splash screen to gameplay for better user experience.
- Worked on browser compatibility issues and performance stability for web gameplay.

VNC – Virtual Network Communication, *Funavry Technologies Project*
- Implemented SCSS-based dark mode and enhanced channel subscription logic using NgRx.
- Improved UI state handling, date flows, and overall user experience.

OCR CNIC Detection, *AXA Business Technologies Project*
- Developed React frontend integrated with OCR services on Python to extract CNIC data from images.
- Delivered secure document scanning workflows with backend service integration.

Telenor DMS, PTML-UFONE, PTML-ONIC, *AXA Business Technologies Projects*
- Developed enterprise Angular modules for telecom platforms with role-based access flows.
- Implemented SIM lifecycle management, localization, and permission handling.
- Delivered secure, role-based, and localized digital solutions for telecom and banking platforms, supporting smart services and financial inclusion goals.

IoT Device Manager + Smart Ambient Lighting, *AXA Business Technologies Projects*
- Built Angular UI for IoT device management and smart lighting control.
- Implemented encrypted API interceptors and improved frontend modularity.

ZTBL – Zarai Taraqiati Bank Limited, *AXA Business Technologies Project*
- Built secure, form-intensive Angular modules for banking workflows.
- Implemented hierarchical data views, document uploads, and Google Maps integration.

Grazeo, My Garage, *CompileSol Projects*
- Converted PSD designs into responsive Angular & React templates.
- Implemented CRUD workflows with REST API integration.

Foodika (FYP), *My Final Year Project*
- Designed and developed a complete food ordering platform as a final year project.
- Implemented vendor, order, and user workflows using React, Node Js, and MySQL.

AMRO, *CompileSol Projects*
- Added CRUD Apis, using .Net Framework and Oracle DB.
- Worked on PL/SQL for creating packages and procedures on Oracle DB.

Education

BS Software Engineering, *International Islamic University, Islamabad*   2015 – 2020
Islamabad, Pakistan

Certificates

PY4E: Python For Everybody - Michigan University
Certification for Python Basics. Include basics from basic to functions/arrays.

AWS Machine Learning - AWS
This is a course about AWS Products where machine learning was used.

Soft Skills Training - OEC & ICMPD
Certification for Enhancing Employability Skills and Career Readiness.

Languages

English — Fluent

Arabic — Basic

Urdu — Native/Bilingual
