📄 Transferable Iqama

Professional Summary

Senior Software Engineer with 5+ years of experience in **Angular (v8–20), React, Next.js, and Node.js**, building scalable enterprise web applications. Strong in **SSR/SPA architecture, NgRx state management, performance optimization**, and secure API integrations including JWT authentication. Experienced delivering fintech, telecom, and SaaS solutions while collaborating with cross-functional teams in Agile environments.

Skills

Frontend
- Angular (v8–20)
- React.js & Next.js
- RxJS
- Signals & NgRX
- Responsive Media Queries
- Tailwind CSS, Bootstrap & PrimeNG

Backend
- Node.js (Express)
- REST APIs
- JWT Authentication
- Middleware
- MySQL (Recursive Queries, Stored Procedures)

Architecture & DevOps
- SPA & SSR Applications (Angular + Next.js)
- State Management (NgRx, React State Patterns)
- Code Splitting
- Lazy Loading
- SEO Optimization (Next.js)
- Enterprise UI Architecture
- Performance Optimization

Programming Languages
- TypeScript
- JavaScript (ES6+)
- Html
- CSS/SCSS
- Python

Tools
- Git
- Jira
- Postman
- Docker (CI/CD support) & AWS (basic)
- Agile/Scrum
- MS Office (Word, Excel & Powerpoint)
- Figma, Zeplin & Adobe Photoshop

UI & Data Visualization
- Chart.js
- ApexCharts
- Responsive Design
- Design Systems
- Accessibility (WCAG basics)

Additional Skills
- Cross-team Collaboration
- Mentoring Junior Developers
- UAT Support & Bug Tracking
- Documentation & Technical Reporting (Excel, Word)

Experience

Senior Software Engineer, *Funavry Technologies*   03/2024 – 01/2026

Promoted from a mid-level to a senior role. As a Senior Developer, my responsibilities evolved from that of an individual contributor to a senior mentor. I was entrusted with leading teams and managing resources across multiple projects, directly communicating with clients, and actively participating in scrum ceremonies throughout the delivery phases.

Key Contributions:

- Led development of **Angular and Next.js** applications for large-scale enterprise and MENA digital platforms, focusing on scalability, SSR performance, and maintainable frontendarchitecture.
- Implemented NgRx-based state management, React States, integrated REST APIs, and optimized frontend performance.
- Mentored junior developers and facilitated cross-functional collaboration.
- Managed Docker pipelines for efficient CI/CD workflows.
- Prepared **Excel reports for UAT evaluations**, tracking bugs, test coverage, and release status in coordination with QA and product teams.

Software Engineer, *Funavry Technologies*   08/2023 – 03/2024

At the start of my tenure at Funavry Technologies, I was assigned responsibility for a social networking platform due to its complex state management requirements. Later, I was entrusted with designing a project's architecture from scratch and leading its development into a fully functional application.

Key Contributions:

- Delivered enterprise modules with high performance and clean architecture.
- Fixed state management changes in NgRX and updated video call interface for IPad devices.
- Collaborated with UI/UX teams to integrate designs via Figma.

Junior Software Engineer (Angular),   03/2021 – 08/2023
AXA Business Technologies (via AKSA SDS), Islamabad, Pakistan

During my tenure at AXA Business Technologies, I gained in-depth expertise in fintech & GSM/Telecom solutions, developed system architecture from scratch, and strengthened my understanding of structured software development through the full SDLC process.

Key Contributions:

- Built Angular libraries and custom architectures for enterprise clients.
- Developed Angular-based frontend applications for SaaS and FinTech platforms.
- Integrated OCR solutions using Flask and EasyOCR with React frontend.

Intern → Junior Full Stack Developer, *CompileSol*   09/2020 – 03/2021

Started my career at Compilesol, a startup that developed ERP-based systems from development to production. Gained hands-on experience across the full lifecycle, from system design to implementation and deployment.

Key Contributions:

- Built ERP modules using Angular and Laravel with API integration.
- Delivered responsive UI from PSD designs and managed API services.

Projects

Del Monte – QFS, *Funavry Technologies Project*
- Managed implementation of secure, performant modules for MENA, NA, TM projects.
- Focused on scalability, modular code, Optimized application performance by 30%, implemented offline support and chatbot integration.
- Contributed to digital process optimization and smart enterprise workflows, aligning with regional digital transformation objectives.

Teamerage (Phase - 1), *Funavry Technologies Project*
- Built the Angular 17 application from scratch using hybrid (standalone + modular) architecture.
- Developed scoring modules and handled client UAT and demos.

Wallet Finder – Blockchain Explorer, *Funavry Technologies Project*
- Managed development for dynamic wallet views, UI releases, PR reviews, and frontend code quality
- Implemented dynamic routing, SSR/CSR optimization, and reusable React components for large-scale, dataheavy views.

Education & Certificates

BS Software Engineering, *International Islamic University, Islamabad*   2015 – 2020
                                                                                                 Islamabad, Pakistan

PY4E: Python For Everybody, *Michigan University*
Certification for Python Basics. Include basics from basic to functions/arrays.

Getting Started with AWS Machine Learning, *AWS*
This is a course about AWS Products where machine learning was used.

Soft Skills Training, *OEC & ICMPD*
Certification for Enhancing Employability Skills and Career Readiness.

Languages

English — Fluent   **Arabic** — Basic

Urdu — Native/Bilingual
