

Abdul Rehman

Software Engineer | Frontend (Angular & React)

✉ abdulrehman31303@gmail.com ☎ +966593240783 📍 Riyadh, Saudi Arabia 📄 Transferable Iqama

Professional Summary

Software Engineer with 5+ years of experience developing enterprise web applications using **Angular** and **React** with **TypeScript**. Strong expertise in **component-based architecture, REST API integration, state management, and responsive UI development**. Experienced in building scalable **Angular applications as primary technology while delivering React and Next.js solutions** aligned with modern SDLC and clean coding practices. Based in Riyadh, immediately for Software Engineer and frontend-focused roles.

Core Skills

Frontend

- Angular (v8-20)
- React.js (Hooks, Functional Components)
- Next.js (SSR Applications)
- Flexbox & Responsive Design
- Tailwind CSS & Bootstrap
- Angular Material & PrimeNG
- Component-Based Architecture
- Reusable UI Components
- Design Systems & Figma Implementation

Software Engineering Practices

- Clean, Readable, Maintainable Code
- Scalable Folder Structure
- Naming Conventions
- Code Reviews & Pull Requests
- Git Branching Strategy
- Agile & Scrum
- SDLC (DEV / UAT / PROD)
- Production Support

Programming Languages

- TypeScript
- JavaScript (ES6+)
- Html
- CSS/SCSS
- Python

Backend

- Node.js
- Express.js
- REST APIs
- JWT Authentication
- Middleware
- MySQL
- Stored Procedures & Recursive Queries
- API Integration
- Backend-Frontend Integration

DevOps & Tools

- Docker (CI/CD Support)
- Git
- Jira & Redmine
- Postman & Swagger
- AWS (Basic)
- Figma & Zeplin
- Adobe Photoshop
- MS Office 360

UI & Data Visualization

- Chart.js
- ApexCharts
- Responsive Design
- Design Systems
- Accessibility (WCAG basics)

Experience

Senior Software Engineer, Funavry Technologies

03/2024 – 01/2026

Promoted from a mid-level to a senior role. As a Senior Developer, my responsibilities evolved from that of an individual contributor to a senior mentor. I was entrusted with leading teams and managing resources across multiple projects, directly communicating with clients, and actively participating in scrum ceremonies throughout the delivery phases.

Key Contributions:

- Led development of **Angular and Next.js enterprise applications** with scalable component-based architecture and high-performance frontend solutions.
- Developed and integrated **Node.js REST APIs with MySQL**, implementing secure authentication and reliable system communication.
- Managed **CI/CD workflows and SDLC environments (DEV/UAT/PROD)** while collaborating with QA and product teams for smooth releases.
- Mentored developers and conducted **technical interviews**, supporting hiring, code quality, and engineering team growth.
- Prepared UAT reports, Excel documentation, and release tracking reports for project monitoring and delivery coordination.
- Supported technical coordination and troubleshooting during project delivery.

Software Engineer, Funavry Technologies

08/2023 – 03/2024

At the start of my tenure at Funavry Technologies, I was assigned responsibility for a social networking platform due to its complex state management requirements. Later, I was entrusted with designing a project's architecture from scratch and leading its development into a fully functional application.

Key Contributions:

- Developed enterprise Angular applications and delivered scalable frontend modules.
- Implemented NgRx state management and improved application performance.
- Integrated REST APIs and handled frontend-backend communication.
- Optimized video call interface and UI components for iPad devices.
- Collaborated with UI/UX teams using Figma for design implementation.
- Participated in agile development and project delivery.
- Primary focus on Angular frontend development.

Junior Software Engineer (Angular),

03/2021 – 08/2023

AXA Business Technologies (via AKSA SDS), Islamabad, Pakistan

During my tenure at AXA Business Technologies, I gained in-depth expertise in fintech & GSM/Telecom solutions, developed system architecture from scratch, and strengthened my understanding of structured software development through the full SDLC process.

Key Contributions:

- Developed Angular-based fintech and telecom enterprise applications.
- Built reusable Angular libraries and structured frontend modules.
- Integrated APIs and worked on enterprise SaaS platforms.
- Participated in full SDLC and agile development processes.
- Collaborated with cross-functional teams for system development and deployment.
- Focused on Angular development and frontend architecture.

Intern → Junior Full Stack Developer, CompileSol

09/2020 – 03/2021

Started my career at CompileSol, a startup that developed ERP-based systems from development to production. Gained hands-on experience across the full lifecycle, from system design to implementation and deployment.

Key Contributions:

- Developed ERP modules using Angular and Laravel. Integrated APIs and built responsive UI from PSD designs.
- Worked on full stack development and system deployment.
- Gained hands-on experience in enterprise application development.

Projects

Wallet Finder – Blockchain Explorer, Funavry Technologies Project

- Developed **React and Next.js application using TypeScript**
- Built **dynamic wallet and transaction views**
- Implemented **REST API integrations**
- Created reusable UI components
- Optimized SSR and performance
- Maintained clean and scalable folder structure

Del Monte – QFS, Funavry Technologies Project

- Developed enterprise Angular modules
- Improved application performance by 30%
- Implemented chatbot and offline support
- Built scalable and modular architecture
- Supported MENA and international platforms

Teamerage (Phase - 1), Funavry Technologies Project

- Built Angular 17 application from scratch
- Developed scoring and evaluation modules
- Handled UAT and client demos
- Implemented responsive UI architecture

Rummy, Funavry Projects

- Fixed and optimized **React-based web views** for Unity WebGL game rendering in browsers.
- Improved loading flow from splash screen to gameplay for better user experience.
- Worked on browser compatibility issues and performance stability for web gameplay.

Education & Certificates

BS Software Engineering, International Islamic University, Islamabad

2015 – 2020
Islamabad, Pakistan

PY4E: Python For Everybody, Michigan University

Certification for Python Basics. Include basics from basic to functions/arrays.

Getting Started with AWS Machine Learning, AWS

This is a course about AWS Products where machine learning was used.

Soft Skills Training, OEC & ICMPD

Certification for Enhancing Employability Skills and Career Readiness.
